

# Ametek Jofra CTC 155 Temperature Dry Block Calibrator

Designed for on-site use, the Jofra CTC 155 is a fast and reliable dry block temperature calibrator. This instrument covers a wide temperature range from -25 to 155°C (-13 to 311°F) enabling it to cover almost all standard industrial temperature calibration applications. Unlike most temperature calibrators, the CTC 155 maintains speed, portability and cleanliness simultaneously.

## KEY FEATURES

- Temperature range from -25 to 1205°C (-13 to 2201°F) with 5 models
- Accuracy to  $\pm 0.2^{\circ}\text{C}$  and Stability to  $\pm 0.04^{\circ}\text{C}$
- Calibrate Long Sensors with the CTC-652s 190 mm immersion depth
- A signal input for an external reference sensor making it possible to improve accuracy even more
- Multi sensor calibration
- Plug and play reference sensors
- IRI - Intelligent Recalibration Information
- Broad range of inserts
- Reference sensor protection
- Silent mode operation
- Weight: CTC-660 6.1 kg / 13.4 lb
- Dimension L x W x H: 248x148x305 mm
