

## ABB SACE PRO10/T RELAY TEST SET

The ABB PRO10/T Relay Test Kit is used to test, programme, and read the parameters of the traditional protection units that are fitted with the legacy Tmax, Isomax, and Emax low voltage circuit-breakers made by ABB SACE. The ABB SACE PRO10/T is also capable of carrying out two different types of tests, automatic and manual. The ABB SACE PRO10/T test unit tests protection units by monitoring both their HW and SW components.

### KEY FEATURES

Tests Performed:

- Trip test by means of SACE TT1 unit
- Protection functions test
- Communication functions test.

Programmable Protection Function Parameters:

- Threshold
- Curve
- Interlocking Parameters
