## **dBd COMMUNICATIONS ATHENA BLOCKED HEADSET**

DBD Athena Blocked headsets are designed for use within the rail industry, specifically for noise-polluted areas. The Athena Blocked headsets provide localised noise suppression up to 20dB to allow clear communication between operators working with loud machinery.

The Athena Blocked headset carrying bag contains two headsets with one master headset, which can integrate with back-to-back radios. Providing a maximum range of 100 metres connectivity. The noise suppression headset is equipped with two enclosed ear domes and microphone, enhancing hearing and clarity of the user.

### **KEY FEATURES**

- Weather resistant enclosure
- Network Rail approved
- Clips on to hardhat
- 20dB of localised noise suppression
- Range: 100 metres
- IP rating: IP66
