# FLUKE 1736 ENERGY LOGGER

The Fluke 1736 is an easy-to-use Three-Phase Power Logger designed for use in a variety of applications including energy assessments and voltage and current event capture.

The Fluke 1736 is highly accurate and easy to set-up due to the optimised user interface, flexible current probes and intelligent measurement verification function, all of which allow users to minimise measurement errors by digitally verifying and correcting common connection errors.

## KEY FEATURES

- Capable of measuring all three phrases and neutral with the flexible current probes
- Comprehensive logging allows 20 separate logging sessions at one time
- Bright, colour touchscreen allowing users to conveniently display data on the graphical display
- Optimised user interface
- Complete “in-field” set-up through the front panel or the Fluke Connect® app
- Fully integrated logging
