OMICRON CIBANO 500 3-IN-1 CIRCUIT BREAKER ANALYSER

The Cibano 500 Circuit Breaker Analyser combines 3 functions into one device. The advanced circuit breaker combines a coil and motor supply, timing analyser, and a micro-ohmmeter. All important CB tests on all types of CBs can be carried out even when a station battery is not available.

KEY FEATURES

- 3-in-1 system: micro-ohmmeter, timing analyzer, and AC/DC power supply
- One system for medium- or high-voltage circuit breakers with live-, dead-tank or GIS-design
- One clear report for all tests
- Circuit Breaker Testing Library (CBTL)
- Low wiring effort
- Lightweight test system (20 kg / 44.1 lbs)
- Timing Test
