Mechanical, Electrical & Low Level Access Specialists

CASE STUDY - NG Bailey Baird & Anchor

**CLIENT: NG Bailey**

**PROJECT: Baird & Anchor, Aberdeen**

*"MEP Hire have been a positive addition to this project. Their mechanical and electrical equipment, low-level access solutions and expert advice have kept our installations running smoothly and on schedule."*

**Robert Adderley SHE Advisor – NG Bailey**

## OVERCOMING LOGISTICAL CHALLENGES TO CREATE A SAFE SITE

**MEP Hire recently supported leading mechanical and electrical contractor NG Bailey to overcome on-site logistical challenges and provide a safe range of equipment...**

Mechanical and electrical contractor NG Bailey were commissioned to work on the Baird Family Hospital and Anchor Centre; the largest project to be procured through the Health Facilities Scotland Framework.

The Baird Family Hospital in Aberdeen will unite all maternity, neonatal, reproductive medicine, breast and gynaecology services, as well as providing a patient hotel and dedicated teaching and research facilities.

As the site is within hospital grounds, NG Bailey faced a logistical challenge in getting equipment to site, needing to adhere to set delivery times and avoid blue light routes for ambulances.

By working closely with NG Bailey's Logistics Manager, Stuart Coyne, MEP Hire were able to support forecasting equipment needs and effectively coordinate deliveries.

**Jamie Warrington,  
Sales Director at MEP  
Hire added,**  
*"No matter whether  
our customers are  
facing challenges  
around logistics on-site  
or need to advise  
users in safe use of  
equipment, MEP Hire  
have proven time  
and time again that  
they can rise to the  
challenge and deliver  
solutions that not only  
deliver a safe site, but  
support timely  
project delivery  
as well."*

NG Bailey also wanted to improve safety whilst working at height by ensuring all access equipment had the ability to be pushed around rather than driven on-site to avoid hazards. By implementing a Push Around Vertical (PAV) access mandate across site, contractors would need to ensure they were familiar in using this range of equipment.

To achieve this, MEP Hire worked with Project Managers on-site to deliver specialist equipment familiarisation so that workers could use machinery confidently and adhere to safety expectations.

MEP Hire delivered PAV familiarisation on-site to 537 workers in total, as well as delivering site surveys to identify the best possible tools and lifting equipment available to fix and move materials across the site.

## About MEP Hire

MEP Hire, a division of Vp plc, provides mechanical, electrical, press-fitting and low-level access products to the UK's specialist building services trades.

Originally founded in 1992, MEP Hire's rich history has built them an enviable reputation for innovation, quality, service and reliability.

Since 2013, MEP Hire branched-out into low-level access products and now offer one of the most comprehensive, youngest and best-maintained fleets in the industry.

MEP Hire offer national coverage from 13 branches across the UK, priding themselves in the specialist knowledge, expertise and skills their dedicated colleagues offer.
